

FAST4-1703 EXPANSION BOARD

One of Alacron's most recent additions to its FastSeries family, based on the TriMedia processor, is Fast4, a PMC daughter-card that lets you add extra TM-1702 processors to your FastImage PCI board.

Fast4 Features

- Up to four TriMedia TM-1702 processors clocked at 500MHz, each having 16-256 MB SDRAM at 1600 MB/sec (DDR 1600). For more information on the Trimedia 1702 processors.
- Proprietary Side band data interface to main board FPGA
 - First processor – 32 Bits VI in at 400 MB/sec and 8 bits VO out at 100 MB/sec
 - Second through fourth processor – 16 Bits VI in at 200 MB/sec
- 32-bit, 33 MHz PCI interface
- Custom form factor
